WORK EXPERIENCE

Front-end Developer Intern

[Techoverflow](#) • July 2023 - September 2023

- Contributed to 3+ client-facing React.js components, improving UI responsiveness and user experience across 2 active web platforms.
- Collaborated in a team of 4 developers, reducing frontend bug count by ~30% during development sprints.
- Applied UI best practices and responsive design techniques, increasing page load speed by 18% using optimized asset loading and cleaner component architecture.

Full Stack Developer

[Cosmo](#) • July 2024 - September 2024 • Lahore, Punjab, Pakistan

- Developed and maintained 5+ full-stack web features using the MERN stack, enhancing performance and usability across two major internal tools.
- Integrated and optimized RESTful APIs, reducing database response time by ~25% and improving overall data flow between client and server.
